EXPERTISE

- Static and dynamic microsimulation
- Tax and benefit legislation: taxes, benefits, social contributions, pensions
- Reform costing, distributional analysis, fiscal incidence
- Survey and administrative data, statistical matching
- Projections of populations, headcount and payroll

TOOLS

Python (pandas, OpenFisca, Shiny)
Statistics: R
Data: SQL
Other: git, $\LaTeX$

LANGUAGES

French
English: read, spoken, written
Arabic: read, spoken, written
Italian: read, spoken

EDUCATION

**Master in Economics
(Analysis and Policy)**
Paris School of Economics, 2007

PhD in Physics
Université Paris VI – ENS, 2000

**Master in Physics
(Magistère interuniversitaire)**
ENS Paris, 1997

TEACHING

Paris School of Economics: Python programming (since 2023), public policy microsimulation (2017–2023)

Paris-Dauphine: Matlab (2009–2012)

Sciences Po: climate and sustainable development (2007–2008)

Université de Bretagne Occidentale: assistant professor, physical oceanography, from bachelor to master's level (2003–2008)

PROFILE

Economist specialising in microsimulation, I build models that translate tax and benefit legislation into code in order to assess the budgetary cost and distributional effects of reforms. I took part in creating the open-source software [OpenFisca](#) and have worked for the IPP, the French National Assembly, the World Bank, the Government of New Caledonia and the City of Paris.

EXPERIENCE

City of Paris

since May 2026

Consultant – index-based pay and payroll drift

- Career simulator for city employees: pay scales, step and grade promotions, reclassifications, sourced from City Council decisions
- Validation against the City's HR data; projection of headcount and payroll
- Web application (Shiny) projecting headcount over 2026–2032 for HR teams

Government of New Caledonia (DINUM)

2025–2026

Consultant – personal income tax modelling

- [OpenFisca New Caledonia](#) model, validated against the official online simulator and the tax administration's tools
- Microsimulation on tax records to assess the cost and distributional effects of reforms; web application to design reforms

World Bank

Nov. 2024 – June 2025

Consultant – reform impact analysis

- Work on *Amen Social*, the Tunisian social assistance programme; microsimulation training and modernisation of the OpenFisca Tunisia model

Institut des politiques publiques (IPP)

2014–2024

Economist

- Development of OpenFisca France (taxes, benefits, indirect taxation, pensions) and of the TAXIPP / TAXIPP-Life models: costing of annual budget bills, basic income, long-term care
- Projections of the dependent elderly population (long-term care chair, Paris School of Economics) and dynamic microsimulation model of the Agirc-Arrco pension scheme
- Fiscal incidence in Côte d'Ivoire, Mali and Senegal (French Development Agency): transcription of national legislation and use of household surveys
- [IPP tax and benefit tables](#): tools to collect, convert and publish the legislative parameters (IPP website, [DBnomics](#)); lead of the CoBaLPP project bringing contributors together

French National Assembly – LexImpact

2023

Economist

- Microsimulation application enabling MPs to assess the distributional impact of their amendments

France Stratégie (Prime Minister's policy office)

2009–2014

Economist

- Creation of OpenFisca; policy briefs on housing, family policy, climate and financial macroeconomics

Earlier

- **Banque de France**, General Inspection: review of banks' internal risk models (2008)
- **Physical oceanographer**: assistant professor (Université de Bretagne Occidentale), postdoctoral fellow (Woods Hole, CNRS), 2001–2008

OPEN-SOURCE PROJECTS

- **OpenFisca**: founding member and board member of the OpenFisca association; co-creator of [OpenFisca France](#), the engine behind French public benefit simulators (Mes droits sociaux, 1jeune1solution)
- **Tunisia**: [OpenFisca Tunisia](#) and pension module, port of the CEQ fiscal incidence analysis, [handbook of tax and benefit legislation](#) (French/Arabic), legal search tools for AI agents (MCP)
